GOLDFLAME HONEYSUCKLE TRADE MARK

A superlative variety; beautiful, hardy and versatile. The large flamelike coral trumpets lined with gold, fragrant after nightfall, appear in immense, showy clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it nevertheless flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers.

Allowed to grow naturally, GOLDFLAME will climb a trellis or spread as a ground cover; if pruned it becomes a striking specimen shrub, while if planted in a row and sheared it gives a smashing effect as an everblooming hedge.

BARBERRY (*Berberis*) Valuable for massing and for low hedging.

BARBERRY MENTORENSIS

U. S. Plant Patent No. 99

Berberis Mentorensis is the result of a cross between Barberry Thunbergi and Barberry Juliana. It has very rugged, strong, upright growing branches and quite formidable thorns. Its foliage is heavy and thick, and of perfect color—a green as dark as the Japanese Yew. Heat and drought resistant. Evergreen in the south.

EVERGREENS

The name WILLIS has become synonymous with Quality in evergreens and there is very good reason for it:

A crew of trained men spends all its time in our evergreens, shearing and pruning with skilled hands to insure compactness and symmetry. No diseases or insect pests are permitted a foothold in our trees and no weeds, noxious or otherwise, will be found in our evergreen blocks. We would like to have you come and see for yourself.

Transplanted stock, field grown, dug fresh as ordered.

Prices include balling and burlapping.

Evergreens selected personally in the field by the purchaser will be invoiced at 20% above published prices

VELVET GRASS

A Beautiful New Lawn Grass!!

Velvet grass two months after planting in our nursery

- Has the density of Bermuda Grass and the beauty of Blue Grass.
- Drought resistant and likes hot weather. Chokes out dandelions and other weeds.
- Rapid growing, giving complete coverage the same season it is planted
- Dense turf of dark green. The foliage is very fine.
- Hardy in Kansas the past five years. Was not injured by the freeze last November.
- Recommended only for locations that receive considerable sunlight.

Planting-time—should not be planted until warm weather, usually after May 1st.

Plant as you would Bermuda, with stolons in rows or in sod squares, (plugs). Water well until established. Clean-cultivate ground until covered with grass. Mow frequently and fairly short.

One square yard of sod is sufficient to plant from 300 to 400 square feet of lawn, depending upon how thick you want to plant. (We will remove the soil before shipping if you prefer.)

1 to 5 yards -----	2.50	per yard
5 to 10 yards -----	2.00	" "
10 yards and up -----	1.50	" "

Orders for less than 1 square yard will be invoiced at 35c per square foot.

FLORIBUNDA ROSES

California-grown

This is a new classification that includes roses selected for their hardiness, ease of culture and for their mass color effect. In the group are found single, semi-double and double flowers, usually produced in large clusters. The Floribunda varieties are primarily intended for bedding, massing or for borders for which purpose they are far superior to annuals or herbaceous material.

Double-Flowering Peaches

Prunus persica albo-plena

- Here is a novelty that is a real business-builder. More showy than Japanese Flowering Cherries and named varieties of Flowering Crabs, but costs much less than either. Furthermore the Double-Flowering Peaches bloom younger and more reliably than cherries and crabs.
- Use them for individual specimens, or for accent in extensive plantings. When planted together in large groups, they give a smashing color-effect. Those who are familiar with the Double-Flowering Peaches are always enthusiastic about them.
- The following list represents some of the very best varieties. All of them are listed in a recent bulletin on rare plants issued by the Arnold Arboretum,

Burbank. Pink bud opening white. Petals large and flowers fully double.

Camelliaflora. Flowers large, full double, deep red.

Peppermint Stick. Moderately double. Flowers white marked with red stripes.

San Jose. Double flowers of clear light pink; earliest to bloom.
